The Cabot-Dimock presentation is located at: **Ex. 6 - Personal Privacy**
The document is titled, "Cabot PROOF w Data Presentation to DEP.pdf".

Thanks for checking on that Sr anomaly.

Rich,

The reported level was 0.126 mg/L. It must not have been converted from ug/L, see attached.

Let me know if you need anything else.

Thanks,

Michael O'Donnell | Water Quality Specialist Supervisor

I see what you mean. The actual sample results are located in the Northcentral region. Mike, can you get Karen the correct value??

Rich

Seth and Rich- Going through the data I think there is an error on the data table for Ex. 6 - Personal Privacy Sept 16, 2010.. A level off 129 for Strontium, when the others were all less than 0.3?? Could you verify when you get a chance? It was a DEP sample.
